

MU03-401

AGED HARD BRONZE

FREEZING TIME THROUGH
A 1000-HOURS AGEING PROCESS

MAURON MUSY

MU03-401

AGED HARD BRONZE

THE FASCINATION OF AN ANCIENT MATERIAL.
THE RESOURCEFULNESS OF STATE-OF-THE-ART
TECHNOLOGY. THE ALLURE OF OUTSTANDING STYLE.
MAURON MUSY OFFERS A BREAKTHROUGH TIMEPIECE
IN ULTRA-TOUGH INDUSTRIAL BRONZE FEATURING A
PATINA DESIGNED TO LAST FOREVER, OFFSET BY THE
LINEARITY OF WHOLLY MODERN KHAKI ETCHING.

A 21ST CENTURY TAKE ON AN AGE-OLD METAL

In 2023, Mauron Musy takes Bronze to 21st century heights with the introduction of a timepiece distinguished by unprecedented toughness, durability and good looks: the MU03-401 AGED HARD BRONZE ARMURE.

A NATURAL 1000-HOUR AGEING PROCESS

Toughness and durability. Such was the challenge behind this exclusive 88-piece limited-edition timepiece. Driven by its insatiable quest for innovation, Mauron Musy has conquered its latest stride into watchmaking eternity: enter the MU03-401 AGED HARD BRONZE ARMURE. The result of two years of R&D, this extraordinary timepiece features the introduction of ultra-hard industrial bronze fused with wholly contemporary khaki. Meeting the technical constraints of the brand's patented gasket-free, direct mechanical nO-Ring® sealing technology, as well as embodying a natural 1000-hour ageing process enabling this 21st century remake of an age-old metal: the AGED HARD BRONZE ARMURE boasts a uniform patina while remaining stable over the long term.

RUGGED SOPHISTICATION AND A POWERFUL HEART

Designed for men of taste. Made for connoisseurs. With its hardened bronze case and a patina that will never change with age, the 44 mm-diameter MU03-401 AGED HARD BRONZE ARMURE features a potent heart with an exclusive self-winding calibre MM01 and a 55-hour power reserve. Finished with an elegant khaki-etched dial, its rugged good looks are sure to last forever.

CALIBRE MM01

This mechanical self-winding movement developed in collaboration with Manufacture La Joux-Perret is endowed with an optimal 55-hour power reserve. The MM01 calibre drives the hours, minutes, small seconds at 9 o'clock and date at 4.5 o'clock. It boasts unique high-end decoration, featuring bridges hollowed and microblasted in the centre, satinbrushed on the periphery and polished on the chamfers so as to reveal the various inscriptions in relief.

ABOUT MAURON MUSY

Founded in 2013 in the Broye Valley, in the heart of the Three Lakes region at the foot of the Swiss Jura, the MAURON MUSY brand was born from the passion of two men: Eric Mauron and Christophe Musy. Driven by the same determination, the two experts in precision mechanics took many months to develop and ensure the reliability of the patented nO-Ring® technology, a real breakthrough innovation that guarantees a perfect gasket-free seal. These pioneers of the watchmaking industry thus charted their own course, well off the beaten track and driven by a constant concern to offer “Swiss Crafted” products. An appellation certifying that 100% of the watch was designed and produced in Switzerland. Much more than a label, “Swiss Crafted” corresponds to an industrial manifesto championed by MAURON MUSY.

TECHNICAL DETAILS

MU03-401 – 88-PIECE LIMITED EDITION

CASE

Bronze, hardened, patinated and aged / 44-mm diameter / 13 mm thick / 36 components / Transparent anti-reflective sapphire crystal and case back / nO-Ring® mechanical water resistance to 300 m. (30 ATM) / Swiss Crafted

MOVEMENT

Calibre MM01 / Exclusive self-winding calibre / 6.55 mm thick / 25 jewels / 167 components / Automatic bidirectional winding / Swiss lever escapement / 55-hour power reserve / 28,800 vib/h (4hz) frequency / 33 mm diameter

FUNCTIONS

Central hours and minutes hands / Small seconds at 9 o'clock / Date: semi-instantaneous date window / Date corrector

DIAL

Matt opaline finish / Green colour / *Champlevé* hour-markers and cartouches, polished, scalloped by chemical etching / Swiss Crafted stamp / Diamond-polished hands
