MU05-103

BLUEPRINT TITANIUM SKELETON

A STUNNING MECHANISM
BORN OF THE ART OF ARCHITECTURE
AND BLUEPRINT DRAWINGS

INNOVATIVE, ELEGANT, INGENUOUS. INSPIRED BY THE
BLUEPRINT DRAWINGS USED BY ENGINEERS FOR THEIR
TECHNICAL DEFINITION SKETCHES, MAURON MUSY
PRESENTS ITS LATEST VENTURE INTO THE WORLD OF
NEW-ERA WATCHMAKING: THE MU05-103.

A TIMEPIECE FOR A SELECT GROUP OF COLLECTORS

Crafted in sleek, state-of-the-art grade 5 titanium, powered by a cutting-edge MM01-SK calibre, the MU05-103 represents the ultimate fusion of industrial design and breathtaking 21st century mechanics. A stylistic interpretation of the most accurate designs known to man. A perfect union of aesthetics and technology. A renaissance of the codes of traditional watchmaking. A journey to the heart of an unparalleled masterpiece.

A MIGHTY SPIRIT BROUGHT TO LIFE

Polished, sophisticated and impossibly creative, the skeletonised MU05-103 springs to life in a vibrant blue achieved by an advanced anodising process and reminiscent of the most sophisticated design drawings. Masterfully revealing the four-fold depths of its inner workings, the titanium dial thus reveals some of the key components of its Manufacture calibre. Its heart beating at 4 Hz; its 55-hour power reserve enough to captivate the most intrepid watchmaking adventurer. And then, when night falls, its spirit come to vibrant life as luminescent white lines, cut with the brilliant green of red gold hands, create a living tableau. Thus is all the technical beauty of this 13-piece limited edition divulged, offering a unique visual experience reserved for just a handful of insiders in the know.

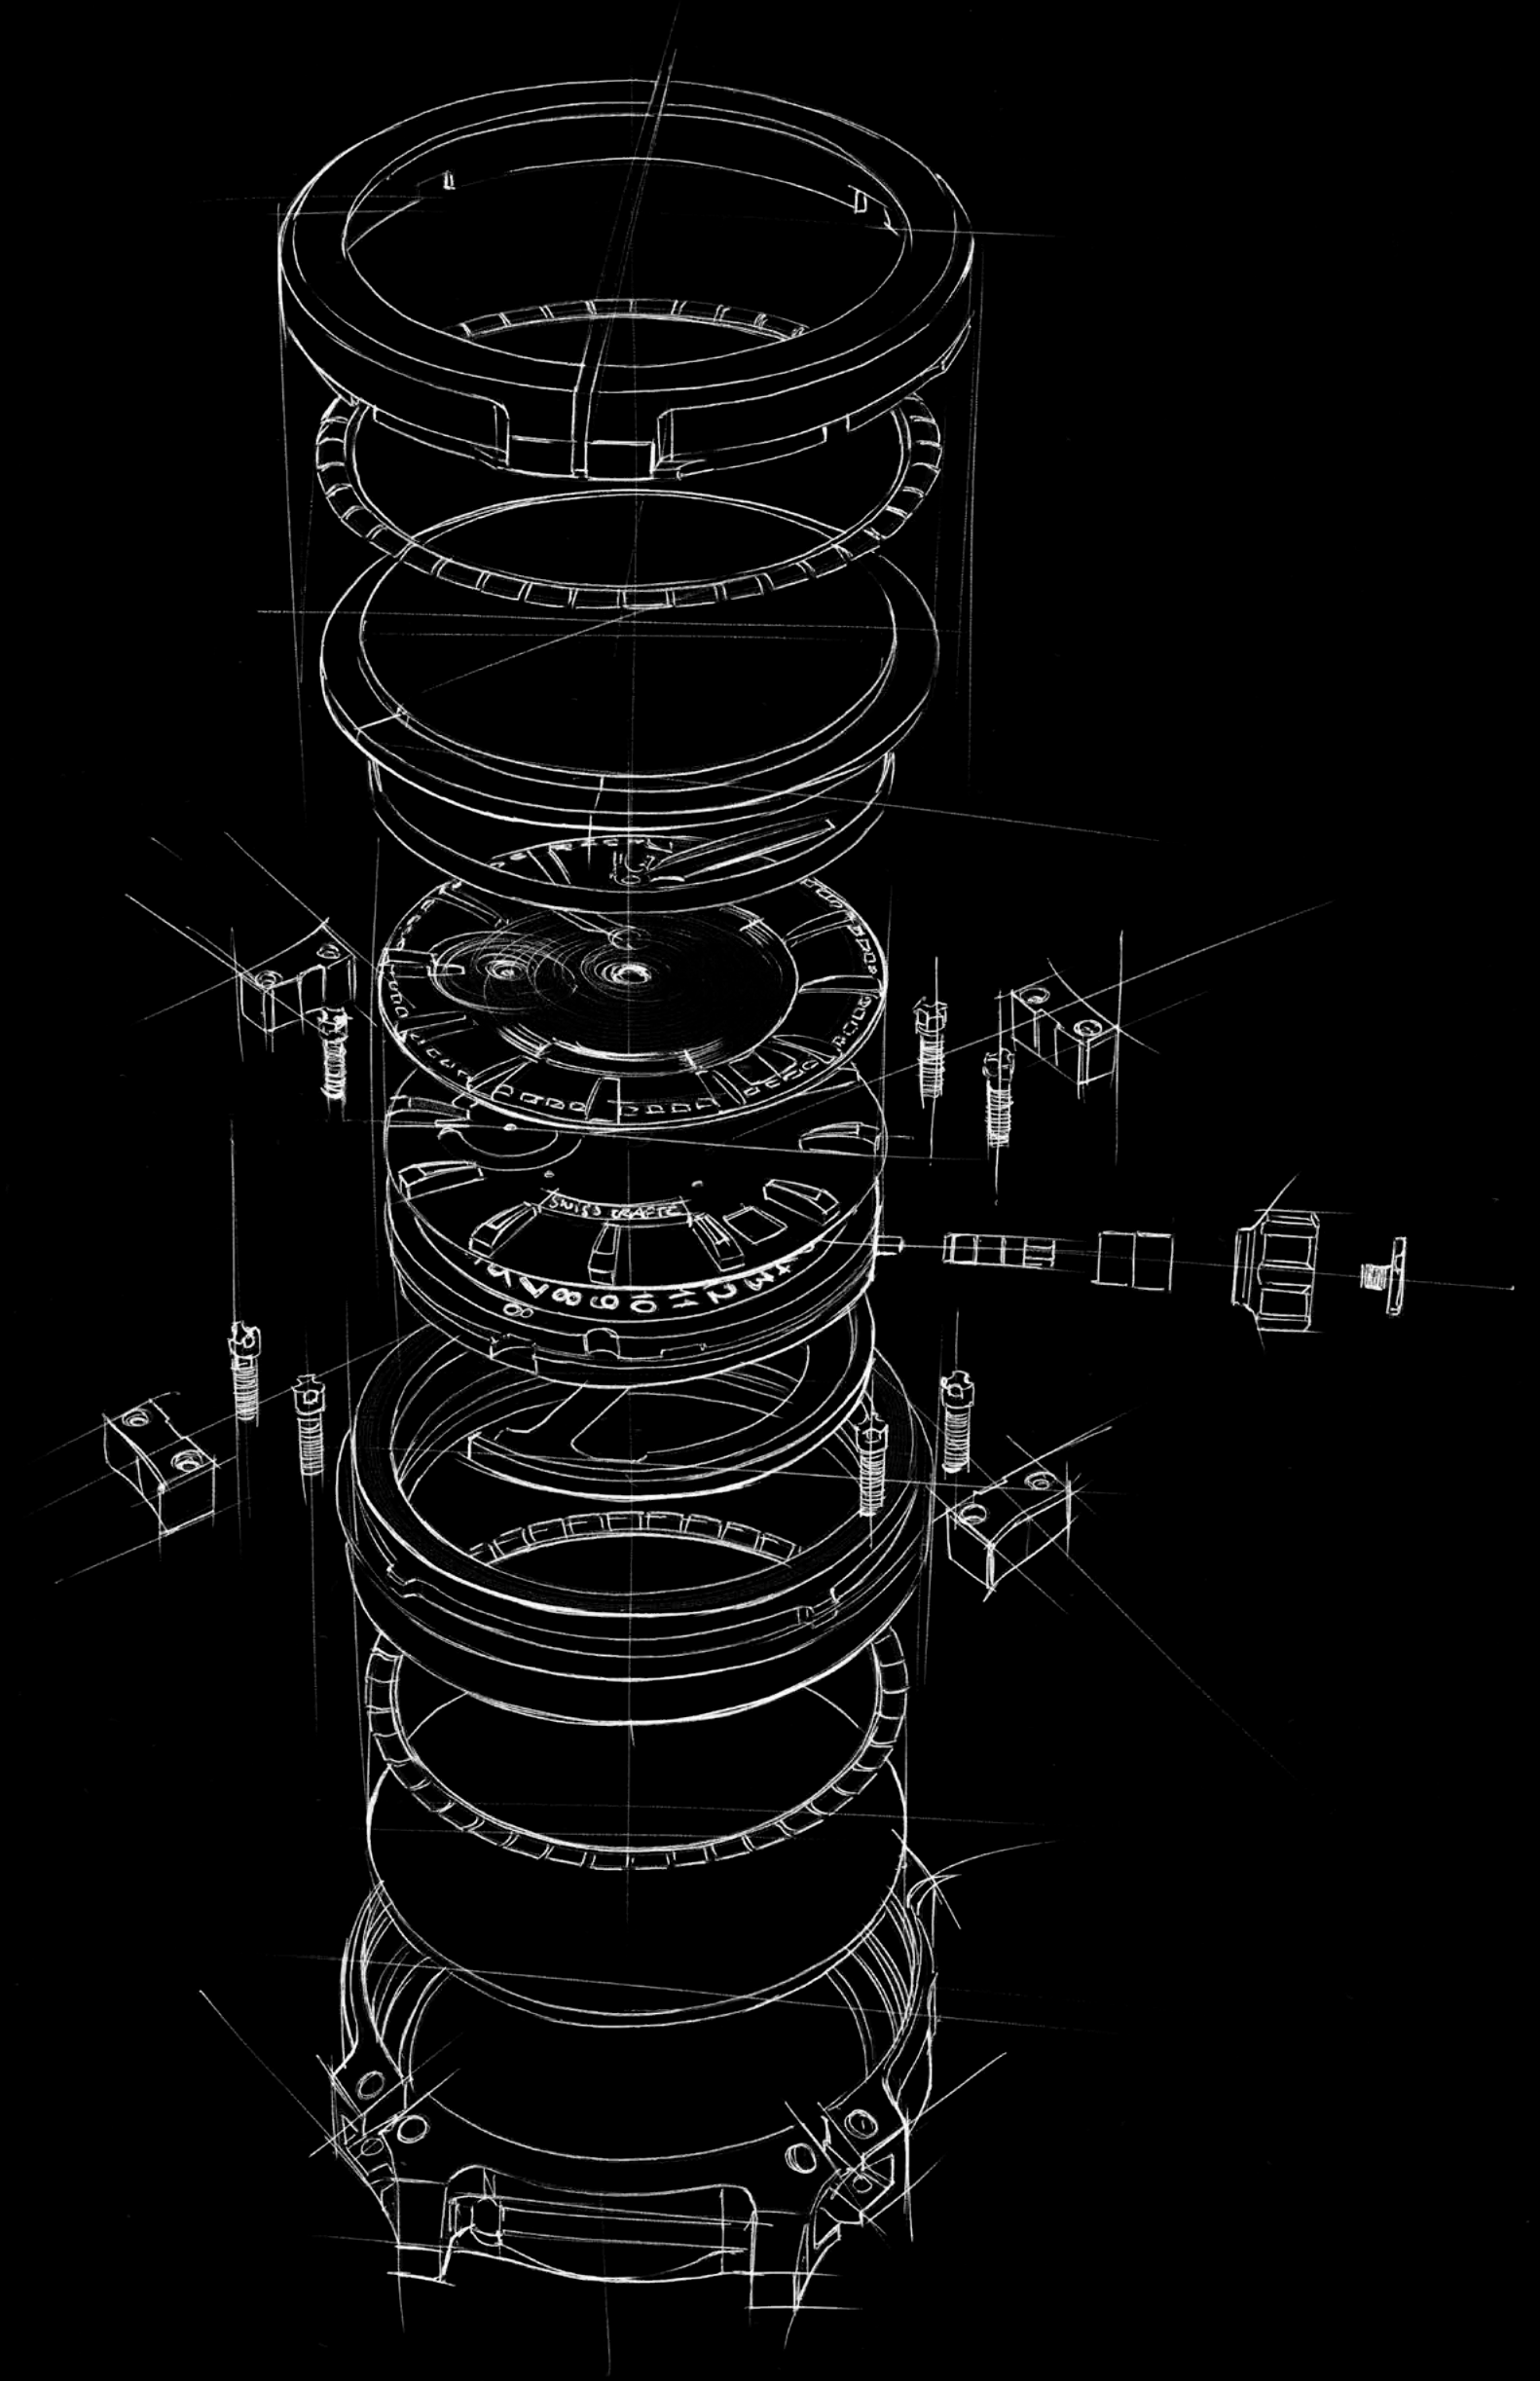

SWISS EXCELLENCE IN ITS SOUL

Proudly stamped with the Swiss Crafted label, a guarantee of the origin of every meticulously crafted component, the finest details of the MU05-103 once again offer undeniable proof of the unshakable commitment to Swiss authenticity and quality for which MAURON MUSY is renowned.

NO-RING® CASE

The entirely in-house made case represents an authentic watch exterior complication in its own right and a world-exclusive feature. MAURON MUSY is the only watch brand in the world to have developed a mechanical gasket-free water-tightness system completely free of the costly maintenance associated with polymer ageing. This patented nO-Ring® method of mechanical gasket-free water-resistance, featuring a design whose very essence is intrinsically linked to the technology involved, requires 36 highly technical elements and ensures a waterproof seal guaranteed to 300 metres.

ABOUT MAURON MUSY

Founded in 2013 in the Broye Valley, in the heart of the Three Lakes region at the foot of the Swiss Jura, the MAURON MUSY brand was born from the passion of two men: Eric Mauron and Christophe Musy. Driven by the same determination, the two experts in precision mechanics took many months to develop and ensure the reliability of the patented nO-Ring® technology, a real breakthrough innovation that guarantees a perfect gasket-free seal. These pioneers of the watchmaking industry thus charted their own course, well off the beaten track and driven by a constant concern to offer “Swiss Crafted” products. An appellation certifying that 100% of the watch was designed and produced in Switzerland. Much more than a label, “Swiss Crafted” corresponds to an industrial manifesto championed by MAURON MUSY.

TECHNICAL DETAILS

MU05-103 – 13-PIECE LIMITED EDITION

MOVEMENT

Calibre MM01-SK / Exclusive self-winding calibre
/ 6.55 mm thick / 25 jewels / 167 components
/ Automatic bidirectional winding / Swiss lever
escapement / 55-hour power reserve / 28,800 vib/h
(4hz) frequency / 33 mm diameter

CASE

Titanium Grade 5 / 44 mm diameter / 13 mm thick / 36
components / Glareproofed sapphire crystal and back
/ nO-Ring® mechanical water resistance to 300 m.
(30 ATM)

STRAP

Delivered with two leather and rubber straps enabling
tool-free interchangeability / Folding clasp

DIAL

Central displays of the hours and minutes, Small
seconds at 9 o'clock / Luminescent-tipped diamond-
polished hands in Rose Gold / Dial in 6 titanium parts,
blue anodized and SLN lines / Diamond-polished
angles / Stamped with the serial number on 13

FINISHING AND DECORATION OF THE MOVEMENT

Snailed and hollowed bridges with microblasted
structure, anthracite NAC coating / Diamond-polished
angles / Microblasted mainplate, anthracite NAC
coating / Sunburst and nickel-plated pallet bridge
/ Rhodium-plated and circular satin-brushed gear
wheels / Steel screws with polished heads / Snailed
tungsten oscillating weight with anthracite NAC
coating

SPECIFIC FEATURES

Limited to 13 / Stamped with the “Swiss Crafted”
inscription (meaning 100% made in Switzerland) /
nO-Ring® technology by Five-year guarantee
